

Many Buick Sales Are Reported

With a list of over twenty purchasers of Buick automobiles awaiting deliveries of 1923 cars, Agent Griffin of Gardena, who is distributor as well for the Torrance district, is devoting a large portion of his time in telephonic conference with the Southern California distributors regarding probable shipments.

He has been assured within the past few days that cars for all his customers will be available soon, and is now attending to the taking of further orders. This year's model is making a "hit" with the motoring public and agents throughout the entire district are reporting phenomenal sales.

Among the cars sold within the past ten days by Mr. Griffin is one to Robert S. Friend of Inglewood; John Rodman of Compton; and R. G. Johnson of the Reeves' Hardware company of Torrance.

The latter is delighted with his new purchase, and though he had never before driven a gear-shift car, drove with a party of friends to San Diego and return last week. He reports that he went up the Torrey Pines grade without shifting gears, and that his engine was never stopped from the time he left Torrance until his arrival in San Diego, and that at no time was the water in the radiator even warm.

Nash Makes the Grade Going Up Crater Lake

Among the Nash sales made last week by T. T. Gardner & Son of Gardena, distributors of that popular car in this district, was that of a 1923 model to L. Edwin, a prominent rancher of Redondo Beach, and a sedan to W. H. Wood, president of the First National Bank of Gardena.

This is the second Nash Mr. Wood has owned and he is delighted with the wonderful improvements made in the late models. With his first car he recently drove to Oregon and visited the renowned Crater Lake. Residents of that vicinity told him that his Nash was the first car that had ever negotiated the Crater Lake mountain in high gear.

A card from R. R. Campbell, who is spending his vacation at Big Pine, states that he is having a fine time there—lots of fish, and doves, and pretty girls. Mr. Campbell says the thermometer stands at 110 in the shade. He also states that there was one nail on the desert, and he picked that one up.
